* Ohjattu harjoitus: Look at the Users and their roles
  * User types

opiframe

* **Create new user in custom domain to Azure Active Directory**
  * 1) Go to Active directory
  * 2) Select Directory with "→" button
  * 3) Select "Users"

opiframe

* Type of User:
  * **New User in your organization** – This is a regular in house user/password combination
  * **User with an existing Microsoft Account** – This uses existing Microsoft's account name. For instance outlook.com account.
    * Useful for letting people outside organization to get in (consultants, temps, partners etc.).
  * **User in another Windows Azure AD directory** – Allows importing existing users within same account. For instance from one project to another.
