Storage Emulator

* **Azure Storage Emulator mimics functionality of Azure Storage without connection to cloud.**

* Storage Emulator is typically used to test basics of Azure Websites without need to worry about provision or cost.

    * Best way to start it is to type "storage emulator" in your finder...

* See also:

    * https://azure.microsoft.com/en-us/documentation/articles/storage-use-emulator/

Storage Emulator

* Storage Emulator needs to have proper authentication to be able to run.

* Application's app.config file must be changed to allow software to tun.

  * 1) Add either your own connection string or use microsoft's default string within

<appSettings>

<add key="StorageConnectionString" value="UseDevelopmentStorage=true" />

</appSettings>
